My favorite places all around the world!

Frankfurt, Germany

Barcelona, Spain

Ghica Palace, Dofteana

Danube Delta

As you can see, i love taking pictures of nature since that's where i feel most at peace.

Favorite foods!!

Pasta

Who doesn't love a good bowl of pasta's? I have to admit, this portion of pasta in particular has to be the best I've ever tasted!

Lollipops

Anything sugary, sweet, maybe with a tint of sourness has me weak. I can admit to having a sweet tooth!

Cotton candy

Speaking of sweet tooth, what is more representative than some burnt flavoured sugar?

Animals

Rocky!

This little puppy right here is a little ball of energy and clumsiness! I took this photo some months ago, so only the memories remain, since he's now all grown up and scary.

Bella

This is the cat that i befriended while staying at a cabin in the mountains. I know she may look a annoyed in this picture, but in real life she would follow me around everywhere!

Gargamica

This cute little duck was my present for my 17th birthday from my parents. I love ducks so much since I used to have one as a pet when i was little that would follow me around the neighbourhood. Right now she has become a big duck who lays eggs that i eat on a daily basis. Investments, right?

Favorite music

Rock music

My passion for rock music came from my father, who introduced me to lots of different bands.

Indie music

One of my dear friends introduced me to this genre and I've been a big fan ever since.

Alternative music

I love this genre beacuse it's similiar to rock, but a bit more up-beat.

Blues rock music

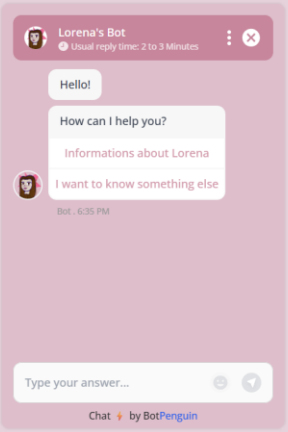

Perfect summer songs!

Volunteering

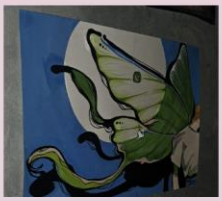

I was able to meet a lot of amazing people through this volunteering club, something that i will be forever grateful for! I got to experience a lot of new things, but I also got the chance to interact with very different people that have all sorts of backgrounds. I feel like this community has helped me grow a lot, both socially and mentally. One of my favorite activities that we've ever done has to be the 'Forest Fiesta', a teambuilding organized by the club in a forest near our city, Bacau. We had to run around the forest in two teams doing all sorts of challenges in order to find a treasure! It was so much fun, even though i was exhausted by the end of the day. We finished the event by telling stories and eating smores all toghether around a campfire. Doesn't it sound like a dream? I was also able to go to a Convention, the fall one more precisely, in Cluj-Napoca. In the first picture you can see almost all of the Leo clubs from all around Romania, all gathered up in order to discuss the projects made in the last three months.

Drawing

Cooking!

Here I made something sweet, pancakes!

I also love something savory, like beef fajitas.

Baking can even bring friends togheter! I love sharing this passion with close ones.

Or maybe even a heart shaped pizza... 💗

The MUN experience

I think that my first experience at BacauMUN was what sparked my interest in extracurricular activities. In case you're wondering, MUN (Model United Nations) is like an extensive debate match where students act as representatives of countries in a pretend United Nations meeting. For example, i represented Rishi Sunak, the Prime Minister of The United Kingdom in the Crisis department. I met a bunch of cool people and had a lot of fun getting to know so many things while also engaging my mind in so many ways.

Boovie

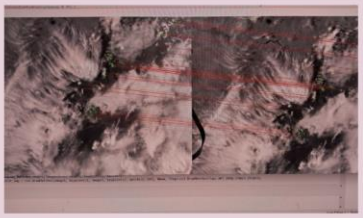

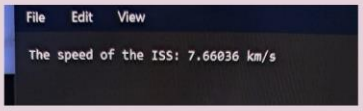

I also participated in the Boovie contest, a film competition where groups of kids all around Romania have to make a trailer for certain given books. I have to admit, this project made me and my friends realise how difficult it is to actually produce even two minutes of content. We worked on it for a whole month, we filmed in forests, abandoned houses, our own houses or even the lake. Even though it was difficult, we had A LOT of fun and I think that this experience has brought us closer.

Favorite computer science contests

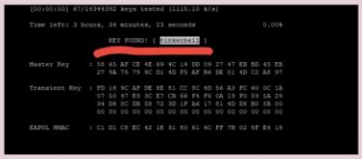

The Astro Pi mission

This contest required a team that would write a python code which would find the speed of the International Space Station(ISS) based on photos that were taken of the earth from said satelite. It was a big challange that required time and learing new things, but i really enjoyed the satisfaction i got in the end. Our code would select pictures taken seconds apart and then a given tool would compare the picture and then calculate the distance the station has travelled. Our code even ran on the ISS and we got the

Cybersecurity Olympiad

When i first heard about it, i thought that i would never be able to study such a vast domain, but with some research and work i decided to give it a try. I find the diverse exercises very challenging but in a fun way and I love spending time trying to figure them out. The satisfaction you get after

"Start" Conference

My friend got invited to this confrence, so she took me along with her to Bucharest! This was a career orientation session at the Chamber of Deputies in the House of Parliament. We heard nine speaches from politicians, diplomats and jurors about their overall career experiences and we were also able to ask them a series of questions. It was very interesting and definetly a unique expereince.
